## Recommendations

- Check 4: Name the kinds of recipients data is shared with (processors, analytics and advertising providers, authorities).
- Check 5: State a retention period or criterion for every category of personal data, not for one.
- Check 7: Give a grievance contact, a response period and a Data Protection Officer or business contact.
- Run a full scan to cover the pages this scan did not reach.

- Accept and Reject were tested once, on the homepage only; at least one of them could not be tested.
- A request shows the browser contacted a service. It does not show that personal data was sent or that a rule was broken.
- This report covers the checkpoints a website scan can test: the website's public pages and the privacy policy's wording.
- 5 pages of the entered domain were scanned of 170 found; the text of pages other than the privacy policy is not kept.
- 165 pages were found but not scanned.
